

# Stetter Semitrailers

- **All advantages of the C-Version**
- **Extremely easy to handle**
- **Optimal driving qualities**
- **10 m<sup>3</sup> or 12m<sup>3</sup> nominal capacity**

All advantages of our best truck mixer were combined with the economical flexibility of semitrailers. The result is a perfectly matching compact unit of vehicle and mixer body: The C-Semitrailer.

Just as the C-Version, also the semitrailer convinces with best driving qualities thanks to a low gravicentric position and a high water line for maximum transport volume.

Vertical surfaces on the rear prevent deposits and enable particularly fast cleaning. Whether as a 2-axle-vehicle with 10 m<sup>3</sup> or on 3-axle-vehicles with 12 m<sup>3</sup> nominal capacity – our new semitrailers offer even more interesting details. The catalogue illustrates it!
